

January 12, 2015

I am very pleased to offer this letter of recommendation for United Breeze Corporation. The ability to partner with United Breeze has allowed us to experience the growth in the residential development market of South Florida with the speed and efficiency we require.

United Breeze has the skills and capacity to take on large scope residential projects on the scale we have set of 30-60 homes per month through our partners Waypoint Homes and Stellar Homes.

We have experienced a significant reduction in HVAC related warranty issues since the partnership with United Breeze was created and we continued to receive the highest levels of services and commitment to our bottom line goals.

The ability for United Breeze to provide us with single rate package pricing as well as the strength they have in purchasing has assisted us in cost savings related to mechanical planning and execution of services.

United Breeze though experts in the HVAC world have also been able to provide our projects with excellent plumbing and electrical services, which really makes the company a one-stop shop for our partners and us.

They are an excellent organization with incredible ethics, transparency and culture and what we appreciate most is that there are never any surprises and the costs we expect to incur on our projects are exactly that. The warranty of work is on point and they go well beyond to ensure that we and our homeowners and renters live worry-free when it comes to cooling and heating of our homes.

Yours Truly,

Frits van Paasschen
CEO of Starwood Hotels and Resorts
